

365 DEFENSE

Microsoft 365 Security Add-on for Blackpoint's 24/7 True Managed Detection + Response

Hackers frequently target Microsoft 365 for business email compromise (BEC), information collection, advanced spear-phishing, and breach/ransomware attacks.

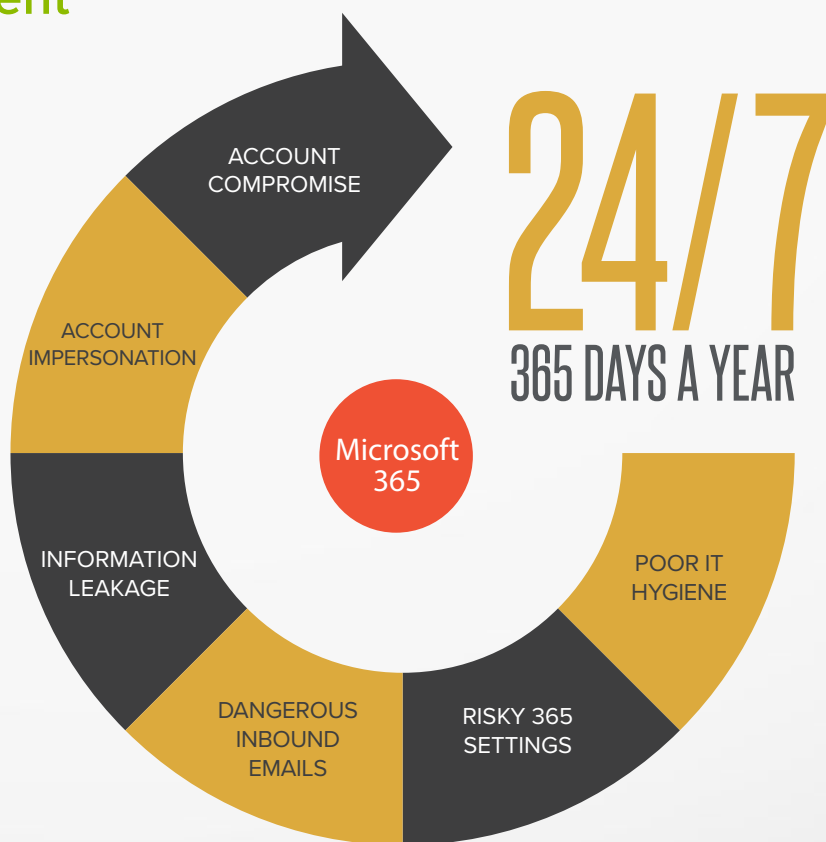

THE SOLUTION: Blackpoint's **365 DEFENSE:** Our Microsoft 365 security add-on

Monitoring and Enforcement of Microsoft 365 Activity

When combined with Blackpoint's MDR service, 365 Defense provides **around-the-clock Microsoft 365 security monitoring and policy enforcement.**

Research shows that hackers are targeting Microsoft 365 accounts with alarming success -- attacks include account compromise via leaked credentials and brute force tactics as well as email impersonation and spear phishing.

With 365 Defense, Blackpoint's cyber analysts can monitor and harden your Microsoft 365 environment and your clients' 365 accounts.

SECURITY MONITORING

- Accounts Created/Deleted
